

Mbakisi Malunga

Software/Data Engineer

SUMMARY

Analytical and detail-oriented Computer Engineering graduate with over 4 years of experience in quality assurance, technical support, and software environments requiring data-driven decision-making. Experienced in analysing network traces, debugging system integrations, tracking defects, and interpreting platform compliance data to identify root causes and improve performance. Proficient in SQL, Python, and data analysis tools, with academic foundation in algorithms, database management, artificial intelligence and machine learning, and web security.

WORK EXPERIENCE

OTT Manual Tester

April 2025 — Present

- Conducted structured testing and data validation to ensure compliance with platform certification requirements and client specifications.
- Analyze system logs and network traffic to identify anomalies, inconsistencies, and integration failures impacting system performance.
- Maintain detailed reporting on testing outcomes, compliance metrics, and recurring defect trends to support audit processes.
- Track and classify incidents based on severity, documenting findings clearly for escalation and resolution.
- Support environment configuration and optimization to ensure accurate test execution and reproducibility of results.
- Use Kiro AI to summarize logs, improve issue descriptions, and speed up documentation and reporting workflows.

Recent Projects:

Portfolio Website — Developed a responsive personal portfolio using React.js, implementing modern web standards, accessibility features, and deployment pipeline; hosted at <https://mbakisimalunga.com/>.
E-commerce Application — Architected and built a full-stack e-commerce platform with Flask REST API backend and React.js frontend, featuring user authentication, payment processing integration, inventory management system, and real-time analytics dashboard

Technical Analyst— Testronic, Warsaw, Poland

Jan 2022 – Sept 2025

- Conducted comprehensive software tests to ensure compliance with platform standards and client specifications such as unit and integration testing
- Analyzed network trace information and documented debugging procedures.
- Built and configured PCs for specific test environments; performed hardware replacements and system upgrades.
- Classified, escalated, and resolved technical issues within tight deadlines.

Junior IT Support Technician — Old Mutual, Harare, Zimbabwe

Feb 2020 – Mar 2021

- Analyzed system performance issues across Windows and Linux environments, identifying trends and resolving recurring technical incidents.
- Automated routine administrative tasks using scripts, improving operational efficiency and reducing manual workload.
- Maintained technical documentation and knowledge base articles to support data tracking and incident reporting.
- Monitored SLA compliance metrics and escalated unresolved cases based on priority and impact analysis.

Education

Poland ,Warsaw ,**Computer Engineering** — VIZJA University Graduated October 2024 .**B.Sc** ,(Mac ,Windows ,Operating Systems (Linux ,Algorithms & Complexities :Coursework Distinctions Frontend ,(Database Management (SQL ,(Security of Web Applications (Wireshark Machine Learning & Deep Learning (Python) ,(Development (React.js

Consent: I hereby consent to the processing of my personal data for recruitment purposes in accordance with Art. 6(1)(a) of the Regulation (EU) 2016/679 (GDPR).
